At present, in spite of the shat-

I know of nothing finer in history than the way in which this army has been raised and maintained by the Belgians in the midst of a cataclysm this frightful and crushing disaster to Belgium occured precisely because no such effort was put forth before the event. The splendid heroism of the present can only repair a small part of the damage due to

the unpreparedness of the past. Belgium has suffered the last extremities of woe, and she would have gone almost unscathed if before the was for a boy's boarding school."war she had prepared an army as New York Times strong relatively to her then strength as the present one is strong relatively to her present weekness.-Theodore Roosevelt in Metropolitan Mag- give much.-Starke

### His Eyes Were Opened.

A candidate for office. Was often heard to say, The horny-handed toiler, Deserves to have his way.

But when he was elected He had a change of mind, And vowed a thoughtful voter Was very hard to find.

Its Awful Velocity In Its Spiral The Stranger Who Inspected the

THE RESULT IF IT STOPPED. HE CHEERED A FEW PATIENTS

Earth Would Be Vaporized by the Heat Generated and a New Nebula Would Blaze in the Heavens.

The direction and speed of the earth's ward the bright star Vega, the most crick. beautiful in the northern aley.

trajectory twenty-two miles per second,

This means that if you could stand beside it and see the earth rush by its whole enormous globe, 8,000 miles in diameter, would pass your eye in about and night (twenty-four hours) the earth travels 1.900,800 miles!

Compared with the velocity of projectiles, the speed of the earth's flight is so great that the swiftest of them would seem to stand still. A rifle bullet may go, say, one-third of a mile per second in the first moments of its flight that is, sixty times slower than the earth, which never stops or slows up.

The initial velocity of some projectiles may be half a mile per second, or forty-four times slower than the earth. If a cannon could be planted out in space and fired at the earth from a distance equal to one-quarter of the earth's diameter (which would be like a hunter firing his rifle about eighteen inches from a deer's side) and if the shot were almed at the front edge at the flying earth (Imagining the latter flat like a disk) and fired with an undiminishing velocity of half a mile per second it would not only miss its mark, but the whole breadth of the earth would have passed by before the ball and traversed one-tenth of the original distance sepa-

rating the cannon from the earth. The motion of the earth becomes pos sibly even more impressive when we consider the awful energy that it produces. Kinetic energy, or the capacity to do work, such as striking a blow, is measured by multiplifing the mass of the moving body by the square of its velocity and dividing the product by 2.

In order to get the result in foot pounds we rection the mass in pounds and divide again by 32 or by 64 in all. exactly 32.18; Is that that number b the unit the feet per seconds of the earth's gravitaten or the acceleration

Calculated in this way, the kinetic energy of the earth comes out at more than ninety sentillion 490 followed by twenty-four zeros) foot pounds! Figured in another way, the energy in the flying earth is equivalent to nearly three sextillions of horsepower, the horsepower being the measure of the work done by 33,000 foot pounds of

energy developed in one minute. That is to say, if the earth could be brought to rest in one minute and all its energy turned into driving machinery it would develop nearly three sex tillions of horsepower. But if it were brought to rest in one second it would develop sixty times more horsepower!

Then we may consider the thermal effects of the earth's kinetic energy if by Instantaneous arrest of the motion it were turned into heat. There would be a sudden development of so tremen dous a temperature that the earth might be vaporized. Puff! And some astronomer on some distant planet aiming his telescope through the cool evening air, would eatch sight of a little new nebula, twinkling like a thistle down blown into the sky of space.

Thereafter the dissipated earth would appear in a catalogue on that faroff world under the name of "Jones' Nebula," and nobody, casually glaucing at it from an observatory and unsympahistory that had been nebulized in that speck of cosmic vapor.-Garrett P. Serviss in New York Journal.

### A Fool's Paradise.

The expression "A fool's paradise meant originally in Christian mythol ogy a region "near the abode of the biessed," but not a part of it, a sort of borderland, "where dwelt the praise less and the blameless dead." Today it is used to denote the mental condition of those who by their vain bopes are "fooling" themselves .- New York Amer-

Ripening Fruits.

Fruits undergo marked changes in cherical composition as they grow to their full size and ripen. In some fruits ripening increases the sugar content and decreases the acid, whereas in some others both sugar and acid content decrease in the ripening process,

Were its Mittien Suddenly Arrested the But the Secret of the Unknown Doctor's influence Did Not Become Apparent Until the Next Day and After He Had Taken His Departure.

It was in the spring of 1802, when flight are the resultants of two motions. Stonewall Jackson, marching down the with which it is endowed—the one shemandon's valley, had won a totiaround the sun, the other with the sun limit victory over General Banks, straight away through space. The com- whom he drove north until the friendbination of these singulaneous motions by Potenne interpresed its screen and causes the earth to travel in a spiral be found safety and care for his sick path whose axis is directed nearly to and wounded in the hospitals of Fred-

A new nurse had been assigned to In lis orbit, or annual path around one of the hospitals the day before the the sun, the curth's mean speed is buttle-a Massachusetts woman named eighteen and one half miles per second. Charlotte McKay, widowed and made while its speed of transition toward childless within a single year. The Vega, Wich it shares with the sun, is patients she had under her care were about twelve riles per second. We mostly Federals of course, but there may call the resultant or combined was a good sprinkling of wounded speed of the earth in its actual spiral Confederates who were prisoners of

One day, just after dinner time, the chief surgeon entered Mrs. McKay's ward, accompanied by a stranger. The man had the appearance of a student. six minutes. It means that in one day His head was bent and his brows were drawn together, with two deep lines between them, as if he had spent long. thoughtful hours at his desk, and his eyes, the color of blue steel, swept the ward with a keen glance that seemed to take in everything. His grizzled beard showed that he was no longer young, but his step and bearing were elastic and vigorous.

"Dr. Janeway is from Louislana," explained the chief as he introduced the stranger. "He had to abandon a large sugar plantation there when the war broke out because of his loyalty. He was a surgeon in the Crimean war and so is interested in seeing how we do things here."

The stranger chatted genially with the nurses and the surgeon, discussed their operating facilities, compared them with those of the Crimen, questioned them about the rations of the prisoners and accepted a steaming cup of hot soup from the nurse.

The prisoners were watching and listening to all that passed, in strong contrast to the sullen indifference they had shown before. One young Virginwere about to spring from his cot,

Unionist. "May I speak to him?" "Yes, doctor; you may talk to any

With a curiously quick and noiseless step the visitor tenched the bed and dier. He returned in a moment,

"I was mistaken. A chance resemblance deceived me. The man says he is 'hankering for a drink,' nurse. I told him I would ask you for it."

The wounded man drank the water, stretched out on his side and appeared to sleep, while the two surgeons went on to another ward and presently left the building. Mounting his horse, Dr. Janeway bade a cordial goodby to the chief, bowed with deep respect to the two women and rode slowly out of the hospital grounds.

the next morning. A laugh passed north of Main street, at the corner of the Board up to 2:00 o'clock, p. m., from time to time. It was almost as if Seventh avenue, north, and Thir- Monday, December 6th, 1915. Ofsome excellent joke unknown to their attendants had raised their courage. "Did you know the gentleman who was here yesterday?" Mrs. McKay

asked the boy soldier. The lad grinned distance of one hundred (100) feet, up at her and replied: "Yes, ma'am."

"You did? Who was he?"

"It was Stonewall Jackson, ma'am." The nurse stared, then she said: "You're making fun of me, Pryor General Jackson here in the midst of our armies!

"It wouldn't be the first time," re torted the boy, nettled by her unbelief. 'More than once, when he hadn't just | ever. the scout he wanted at hand, he has gone on his own errands."

"But what if he should be recog-

"Who's to recognize him? None of your folks, for those who would know him are fighting, not nursing the sick. And none of ours, for they wouldn't tell if they saw him. Reason he spoke to me yesterday was 'enuse I was showing too much interest. I'm one of his 'foot cavalry,' ma'am. He wanted and adequate for a stock farm. This to know just how we was bein' treat-

ed, and so he came to see." "We try to do the best we can for

you, Pryor." "Yes, ma'am. I told him so. We've been treated a heap better than we expected to be. But it's tough to be a prisoner, you know. And that was Stonewall Jackson."-Youth's Compan-

Nothing Gratis. "You can't get something for nothing

in this life. "That's right," replied the gloomy ettizen. "If I want even a few kind words about my disposition and some hope of future success I've got to go to a fortune teller and pay for them."-Washington Star.

Plenty on Hand. "Have you ever wondered about your husband's past?"

"Dear nie, no. I have all I can do in taking care of his present and worrying about his future." -Boston Herald.
